# An Internship Report Presented to the DEPARTMENT OF COMPUTER SCIENCE & ENGINEERING

In Partial Fulfillment of the Requirements for the Degree Bachelor of Science in Computer of Science & Engineering

# <u>Supervised By</u> Muhammed Samsuddoha Alam

Assistant Professor
Department of Computer Science & Engineering
Northern University Bangladesh

Submitted By Md. Sheek Forid

ID: CSE160301026 DEPT OF CSE

Date of Submission: 15th June, 2021

#### **APPROVAL**

The Industrial Training Report on "Web Development" submitted by Md. Sheek Forid, ID: CSE1603010426 to the Department of Computer Science & Engineering has been accepted as satisfactory for the Course CSE 4389 titled Field work (Industrial Training).

## **Board of Examiners:**

1. Muhammed Samsuddoha Alam

(Supervisor)

2. Md. Ruhul Amin

(Examiner)

#### Md. Raihan-uI-Masood

Associate Professor & Head Department of Computer Science & Engineering Northern University Bangladesh

Md. Ruhul Amin Assistant Professor & Coordinator (CSE Dept. of CSE, Northern University

Bangladesh

Muhammed Samsuddoha Alam Assistant Professor & Coordinator (CSE Evening) Dept. of CSE, Northern University Bangladesh

**Letter of Submitter** 

I am here by submitting my Internship Report entitled "Web Development" which was

a requirement for the completion of the CSE Program. I have discovered this study very

interesting, beneficial and insightful.

The entire report is based on my practical experience in Nebulas IT. I expect this

report to be informative as well as comprehensive. This Internship program and

preparation of report has given me the opportunity to gather knowledge about web

development sector and will help me a lot in my future career life.

Thank You very much for your guidance and cooperation during the course without

which this internship report cannot be completed. Moreover, if you have any further

enquiry concerning any additional information I would be very pleased to clarify that.

Yours Sincerely,

\_\_\_\_

Md. Sheek Forid

10th May 2021,

To Whom It May Concern,

#### RE: Mr Sheek Forid -Intern At Nebulas IT

This letter is mention that Mr. Sheek Forid has served as an intern from 01st October 2020 to 30th April 2021 at our company, Nebulas IT Limited. I have been his direct supervisor during this period.

Since the responsibility of his position on 01/10/2021 until 30/04/2021, He had attended dutifully to the company's office hour and fully utilizing the time provided to finish the given tasks before deadlines. During this short spell of times he is found to be punctual, active, display understanding communicating with his superiors, and is very dedicated to the duties.

Mr. Forid has undertaken a variety of company portfolios, namely for:

## Front End Development [ReactJs] | learning and development

- React component concept
- React Routing
- Implement and working with API and react fetching
- · Optimizing site speed performance
- Responsive design in different device

184, Senpara Parbata, Razia Plaza (4th Floor), Mirpur-10, Dhaka-1216, Bangladesh Contact: 02-9032597, 01711-927829

It was a pleasure to working with Mr. Forid, who has displayed keen initiative to learn and a sense of responsibility to complete the tasks assigned on time. He definitely has the potential to do even better in overall performance with more opportunities. We enjoyed his positive personality and appreciated his work done at NIT.

Based on his performance, i have no hesitation in recommending his for employment at your company. We wished him the best of luck and success in his future endeavors.

Sincerely,

Signature here

Arif Rahman Director Operation,

Nebulas IT Limited

#### **Abstract**

The Project title "Appointment System" is a web Application where a nurse and doctor can make appointment their patient using this software to anywhere anytime in there server. This Software includes user dashboard, register and login system, appointment system, appointment list and also doctor and nurse edit the appointment after completed the appointment. This whole software is built using php and php framework laravel for backend and HTML, CSS and JavaScript for front end. We also worked on the responsiveness design for any size of device.

## **Chapter One**

#### Introduction

## 1.1 Background of the report:

As a student of Bachelor of Computer Science & Engineering I was sent to Nebulas Institute limited to conduct a practical orientation for fulfilling the requirement of 6 months internship. The main purpose of the program is to expose the students to real world situation. The goal of this analysis is to apply classroom learning in practice.

## 1.2 Origin Of the report:

This report is the result of Six months long internship program conducted at Nebulas Institute Limited. Internship is the best learning process to know about the organization and cope up the environment in such a way like professional employees. The experience that I got by working as an intern will help me in future.

## 1.3 Object of the Study

Main objective of the report is to fulfill the requirement of CSE program.

Secondary object:

- ❖ To Understand and analyze the overall activities of IT Sector
- ❖ To evaluate the existing activities and techniques
- ❖ To work on a real-life problem and solution.

The main objective of this internship is to learn actually how to implement of my knowledge of the bachelor degree in a software company, how to improvise my learning and make feasible my ideas and thinking on the real-life software company. My aim is to do some creative things in order to help human being by using my engineering knowledge on computer science.

It was a great opportunity for me to work for a well-known company and to help and learn from them to utilize my knowledge of my bachelor degree.

It is also the very first sector for a fresh graduate to work on a real-life problem and solution.

# 1.4 Scope of the report:

This report is the reflection of the days I spent at internship. It has the list of my achievements, my activities and learning, mental and professional growth.

I feel, I have improved myself. I am not standing at the place where I was before the Internship. I am ahead. This report will put the light on that fact.

This report also gives a brief description of the company, Nebulas IT Limited in case of any one has any intention of carry his/her professional life with this company.

## **Company Profile**

#### 1.5 About Nebulas IT Limited:

Nebulas IT offers different products and services within the IT domain. We meet customer requirements and provides optimum and customized solutions for organization.

Nebulas IT began its journey on 25 January 2016. In the beginning, it was more focusing on skilled base IT training but currently it is offering various services including software development, Digital Marketing, IT Consultancy, IT resource recruitment, Networking Solutions. Computer Hardware Equipment Supply.

Nebulas IT is focusing exclusively in high quality and cost-effective software development and implementation of IT services. We are advancing on a tremendous pace with involvement of skilled and experienced people working in the organization. It is one the fastest growing IT Company in Bangladesh. It has been contributing to reduce unemployment problem in Bangladesh.

#### 1.6 Mission

Our mission is to develop present situation of our unemployment. We want to give best training so that we can spared out importance of ICT among our people.

#### 1.7 Vision

To become a prime performer, in providing quality Training and Software solutions in the competitive local & global market place.

# 1.8 Technologies they are working on:

They are successful because they adapt concurrent technologies required by market. They have technical expertise in following areas -

#### **Android**

They work on Mobile App development and have some number of software solutions for Android.

# **Web Development**

They started their development work in web sector and since then they have done a lot of works in it.

# 1.9 What They Serve in Training:

They serve the following sectors to their clients –

- **❖** Software Development
- Web Development
- Mobile Apps Development
- CCNA
- **❖** MikroKit
- **❖** Database Administrator
- Digital Marketing
- ❖ UI/UX
- Graphics Design
- Logo Design
- ❖ Fundamental Computer

## Learning

## 1.10 The Beginning

I joined Nebulas IT on September 01, 2020. I signed a contract with them for six months. My position was "Front End Developer Intern". Firstly, they offered two platforms, between which I had to learn and worked for Web and after observing my progress and effort they taught me Backend and let me work with them to one of their live projects for the rest period. Now I am also trainer for two courses which is front end development and fundamental computer.

## 1.11 Web Development

Web programming, also known as web development, is the creation of dynamic web applications. Examples of web applications are social networking sites like Facebook or e-commerce sites like Amazon.

There are two broad divisions of web development – front-end development (also called client-side development) and back-end development (also called server-side development).

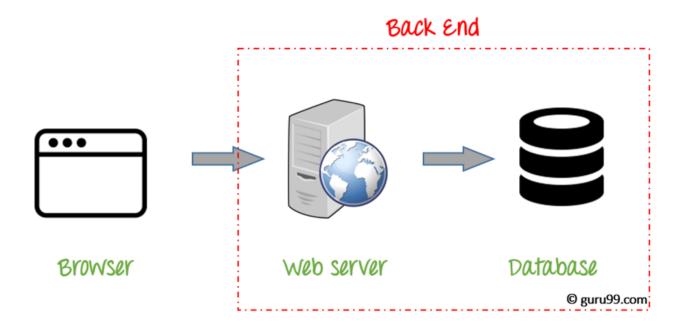

# **\*** Front End Development:

Front-end web development, also known as client-side development is the practice of producing HTML, CSS and JavaScript for a website or Web Application so that a user can see and interact with them directly. The challenge associated with front end development is that the tools and techniques used to create the front end of a website change constantly and so the developer needs to constantly be aware of how the field is developing.

The objective of designing a site is to ensure that when the users open up the site they see the information in a format that is easy to read and relevant. This is further complicated by the fact that users now use a large variety of devices with varying screen sizes and resolutions thus forcing the designer to take into consideration these aspects when designing the site. They need to ensure that their site comes up correctly in different browsers (cross-browser), different operating systems (cross-platform) and different devices (cross-device), which requires careful planning on the side of the developer.

## **A** Backend Development:

Back-end Development refers to the server-side development. It focuses on databases, scripting, and website architecture. It contains behind-the-scene activities that occur when performing any action on a website. It can be an account login or making a purchase from an online store. Code written by back-end developers helps browsers to communicate with database information.

Following are the skills you require to become a back end developer:

- Web Development Languages
- Database and Cache
- Server
- ❖ API (REST & SOAP)

# **Chapter Three**

## **Project**

# 2.1 Doctor Appointment:

Appointment software is a web base software where doctor and nurse can make appointment their patient using this software. Currently it's working only two pc in locally.

## 2.2 Some Screenshot of UI and Description

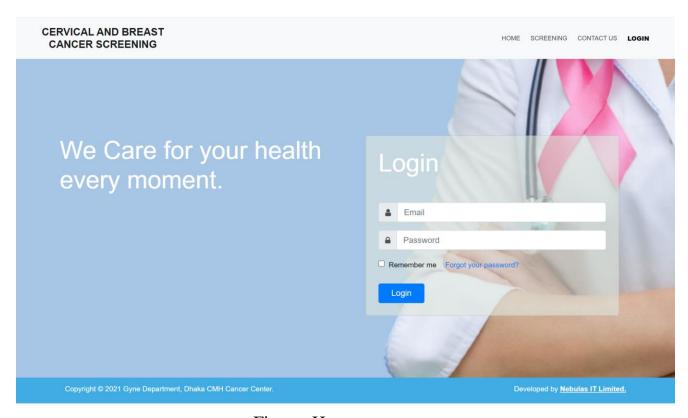

Figure: Home page

# **Home Page:**

This is the home page interface that is displayed when any user visit the site. First of all user can show only home, screening, contact and login popup.

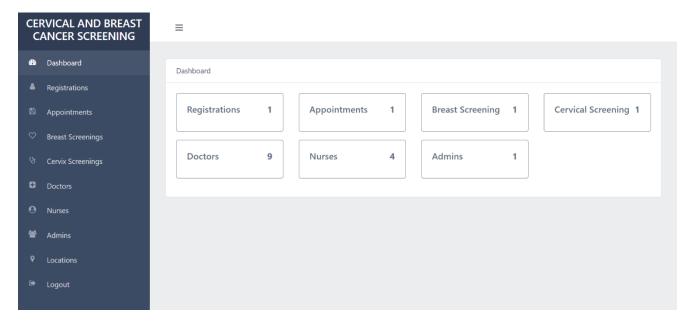

Figure: Admin dashboard

#### Admin dashboard:

Admin dashboard where admin create new doctor, create new nurse and show all appointments, doctors, nurses and also show breast and cervix screening patient data.

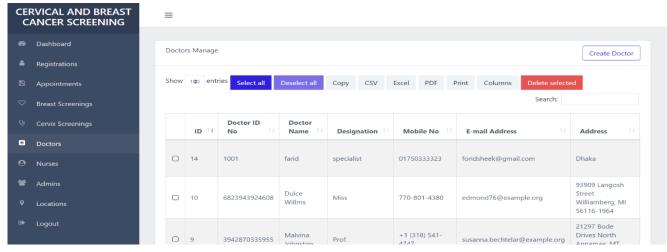

Figure: Create new doctor

#### **Doctors:**

When admin click create doctor button one popup form will show after fill up the form and click save button doctor create complete. Here is the create doctor screenshot

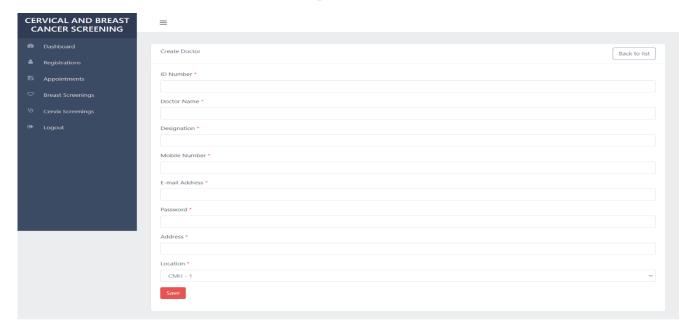

Figure: New doctor create form

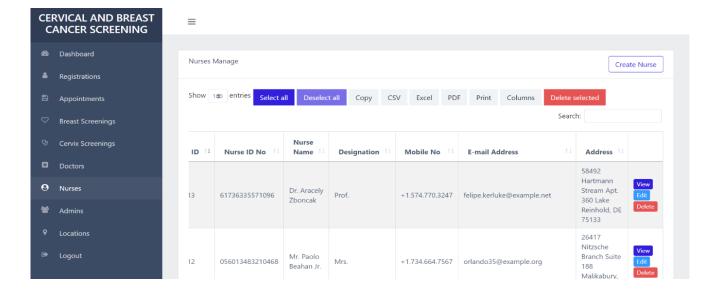

Figure: Create Nurse

Now I am explain my whole project working procedure.

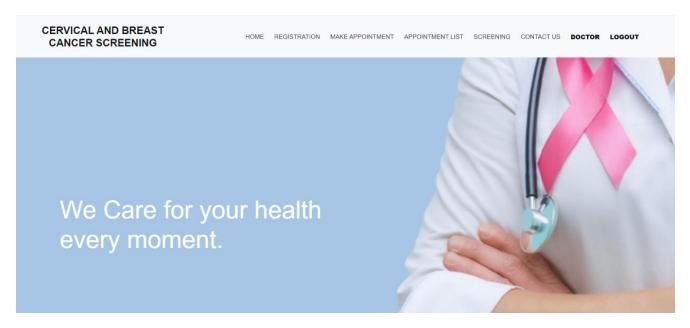

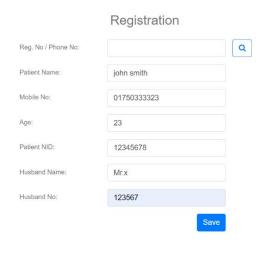

Figure: Logged in user interface

# Logged in user interface:

Only display this interface when the user is logged in.

Developed by Nebulas IT Limited.

Figure: Registration form

# **Registration form:**

First of all nurse or doctor create registration only new user via registration menu when registration form fill up complete and click save button system automatically redirect to appointment menu.

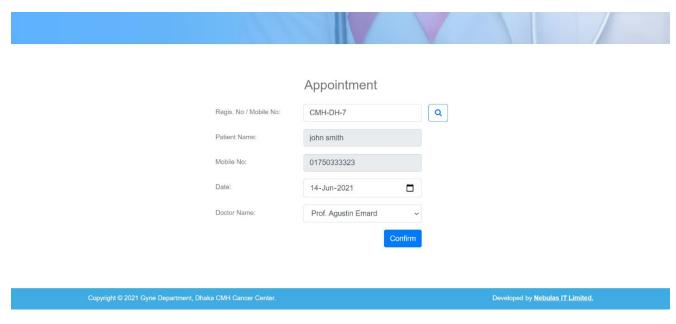

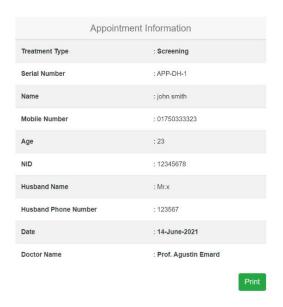

Figure: Appointment Form

# **Appointment Form:**

Here nurse/doctor select date and doctor name for booking patient appointment. When nurse click confirm button system redirect to appointment information popup interface page where nurse can show the appointment patient all information and also print the appointment via pos printer.

Page 19 of 24

Figure: Appointment Information

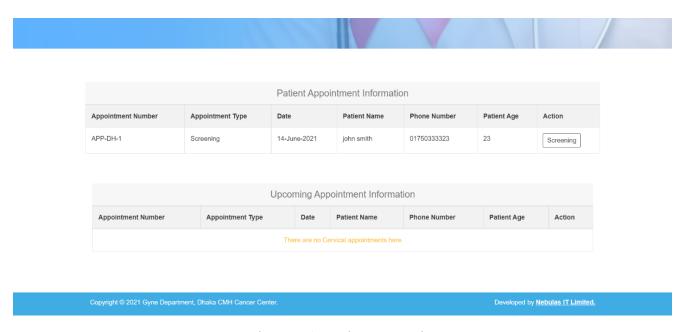

Figure: Appointment List

# **Appointment List:**

When doctor login in and click appointment list menu he/she show the appointment list which is two category base first one is present appointment and second one is upcoming appointment. When doctor finished to seeing his/her patient then doctor will click on the screening button to give a print copy of patient problem.

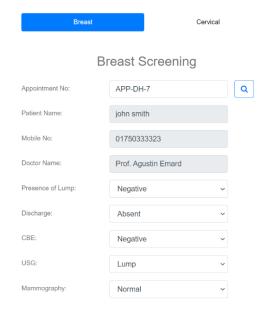

Figure: Breast Form

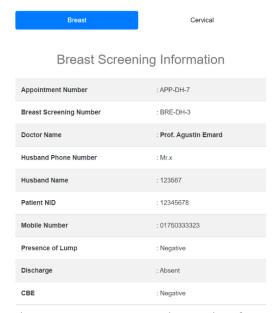

Figure: Breast screening print form

# **Breast Screening:**

When doctor fill up breast screening form and click save button system automatically show breast screening information and also show print button. When doctor click print button breast screening information problem copy print automatically via printer machine.

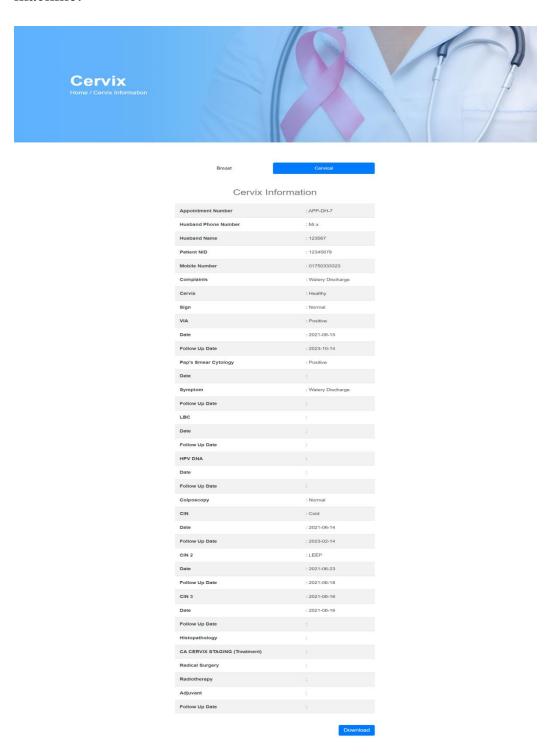

Figure: Cervix screening information

# **Cervix Screening Information:**

When doctor fill up cervix screening form and click save button system automatically show cervix screening information and also show download button. When doctor click download button breast screening information problem copy open in another tab after that doctor print the patient problem copy via printer machine.

Figure: Action Complete

When the copies of the patient's problem are printed, the action button will be completed automatically from the screening.

#### 2.3 Overview

Doctor Appointment Software is a web based software where doctors and nurses can make their patient appointments.

#### **2.4 Team**

Our project manager was Arif Rahman and Backend Developer Moshiur Rahman. I was assigned to Front End design and he supervised me.

#### 2.5 How I Contributed

My company provided me the layout psd files. By observing them, I have design the front end according that and made it responsive.

## 2.6 Technologies and tools used

As there is one language available which is PHP and PHP framework which is laravel.

## 2.7 Challenges

Responsive design was a little bit tough to calculate for different screen size. I had to research much for it to get rational values by using them we could get responsive dimensions.

#### 2.8 Conclusion

I am very glad to summarize the above Intern report. To summarize this report I can say, I have learnt a lot from the company both technically and professionally.. I had a good lesson about very latest technology to use in a software firm actually in a short period of my intern time I went through a big process and observed how a software company works as I worked on live project under supervision of my project manager, I learnt various sector and observed how the sectors of a software company is related to each other.

Finally, I want to thanks almighty Allah and my honorable supervisor for giving me opportunity to complete my intern report.
